AUTOMOTIVE

# Powertrain

## Global Engine & Transmission Forecast

An essential source of combustion engine, transmission and electrification forecasts for the global Light Vehicle market.

# Forecast Market Growth Production

Targeted data to help you maximise your opportunities

## Success requires smart thinking

The Global Powertrain Forecast looks at all the engine, transmission, hybrid/electric drivetrains fitted to each Light Vehicle.

Our eight-year forecasts provide monthly insights for short-term (operational) monitoring, mid-term (tactical) planning and long-term (strategic) initiatives.

### Data Fields:

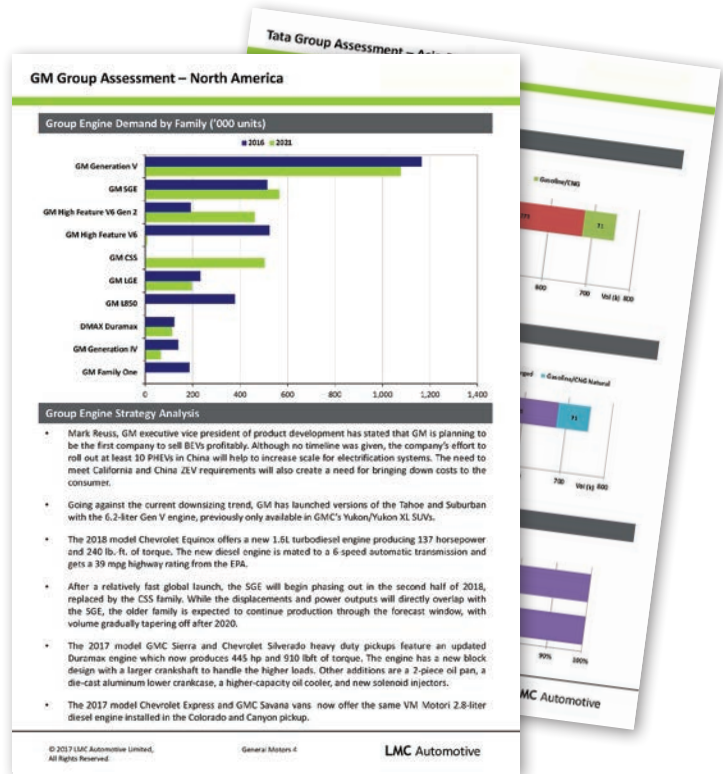

Region	Production plant	Engine design lead	Engine plant & platform
Country	SOP/EOP	Engine family	SOF/EOF
Sales group		Fuel type	
Manufacturer	Engine orientation	Displacement	Transmission name
Global brand	Engine position	Cylinder information	Transmission design lead
Model platform	Hybrid/EV type	Valvetrain information	Transmission speed
Model name	Stop/Start	Cam drive	Clutch type
Design lead	Total system power	Engine boost	Transmission manufacturer
Design lead country		IC power	Transmission plant
Production brand	Engine type	Engine manufacturer	SOF/EOF

## Access industry expertise

Navigating the automotive sector is complex, but incorporating the right guidance, at the right time, can unlock significant opportunities and mitigate risks. Our data is accompanied by:

- **Volume splits** for front, rear and all-wheel drive, segregated by country, make and model for all engine and transmission types.
- **In-depth assessments** of each major OEM, including strategies and prospects for future engine and transmission fitment.

## Power business decisions

Interact and analyse the data on our online platform **Compass**.

Analyse and visualise the forecast with the help of useful filters, selections and graphics.

Our coverage extends to:
